Allowable Subject Matter

1. Claims 20-26 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record, either singly or in combination, fails to disclose the limitations of:

forming a first channel region over and in contact with said first device region, wherein said first channel region has an opposite conductivity type than the first device region;

forming a second channel region over and in contact with said second device region wherein said second channel region has an opposite conductivity type than the second device region;

forming a gate adjacent said first channel region for said first field-effect transistor, wherein said gate has a first predetermined gate oxide thickness; and

forming a gate adjacent said second channel region for said second field-effect transistor, wherein said gate has a second predetermined gate oxide thickness, and wherein said first predetermined thickness is different than the second predetermined thickness. The channel region over and in contact with said first device region, in combination with forming a gate adjacent said first channel region makes this a vertical field effect transistor. The prior art of record does not disclose forming vertical gates with different gate oxide thicknesses.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
